

Xavier de La Taille

Adjuster since 2020

ADJUSTING FIELDS

Building / Civil engineering

Industry

Retail

Engineering structures

Construction

Underpinning structural repairs

Materials

Composite materials and polymers

Concrete pathologies

Mechanical engineering

Investigation of causes and circumstances of fires

SIGNIFICANT LOSSES

Fire in an industrial building - France : €6M

Defense sector (sensitive site). Implementation of emergency measures for the IT system to ensure business continuity, root cause analysis, and cost estimation of damage to equipment and the building.

Collapse of a shopping mall roof - France : €8M

Commercial building with a steel frame structure. Monitoring of temporary protective measures and cost estimation proposed by the project management team. Analysis of the cause and liability.

Water damage in a logistics warehouse - France : €6M

Failure of a flexible hose in the sprinkler system causing damage to goods. Analysis of the mechanical stresses that led to the hose failure, and cost estimation of the damage.

TRAINING

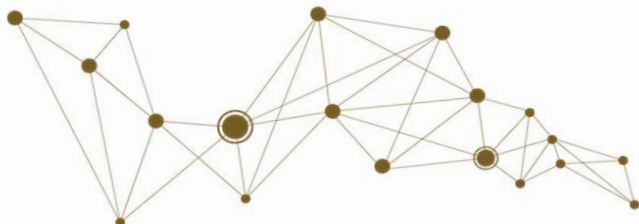

Qualified engineer (Arts et Métiers) - 2020

specialization in composite materials and polymers, PIMM laboratory

Certificate of competence for Fire Investigation delivered by CNPP

LANGUAGES

French, English, German
